To whom it may concern:

It is a distinct pleasure to recommend to you **Marcos Senna Benaion Leal**, enrolled in Computer Science at the Federal University of Para (UFPA). I have been in contact with Marcos since 2012, when he attended three courses taught by me. Marcos always showed initiative and creativity in the solutions of different problems. The final tests, which involved implementing softwares related to Computer System Simulation and resources learned in Object-Oriented Programming and C-based Programming, he showed his skills in programming and modeling of software as well as the capacity to apply this knowledge in different areas. He developed a complete system with UML diagrams and codes in Java for registration of components of a programming project. His grades in every course was 100%.

In my observation of Marcos Senna, he has clearly demonstrated essential academic and intellectual abilities, with an active commitment to his duties. He is organized and reliable. Furthermore, he can work independently as well as in teams, and is able to follow through to ensure that the job gets done.

I do believe Marcos Senna is very capable of successfully completing his studies and has a very successful participation in any international program.

Therefore, I give my highest recommendation to him. If you have any further questions with regard to his background or qualifications, please do not hesitate to contact me.

Sincerely,
